

# SAFER FARMS

**KEEP SAFE, KEEP FARMING**

---

There are hundreds of serious injuries on farms every year. WorkSafe New Zealand wants to work with everyone in the agricultural sector to improve the health and safety record on New Zealand farms.

WorkSafe inspectors are visiting farms in your area over the next few months.

**We often call in and meet on farm or you can book a convenient time for us to visit.**

# WHEN AN INSPECTOR CALLS

---

## AN INSPECTOR MAY DISCUSS:

How you identify and control risks

How you manage health and safety in the workplace

Accident reporting

Training and supervision of employees

Vehicle selection and safe use eg bike helmets  
and guarding of PTO on tractor

Use and storage of hazardous substances

Machinery and vehicle maintenance.

This is also an opportunity for our inspectors to answer any health and safety questions you may have.
